

Order: 8594

Experiment type: Random Intervention

## Thank you for sponsoring the Million Molecule Challenge!

Below you will find the data for the treatment you sponsored. Please remember that this data is conducted in a model system and is not intended to inform personal health decisions. Please consult your physician before making changes to your personal health regimen.

### Advice on data interpretation

At Ora Biomedical Inc. we conduct rigorous science with the goal of producing the highest quality, reproducible data. While a single promising result is exciting (and a negative result may be disheartening), please keep in mind that this data represents a single experiment performed at a single dose. Treatments were compared to matched solvent-only controls conducted at the same time. Insights gleaned from this study only reflect the specific dose and testing regime used. For context, highly promising interventions produce lifespan extensions between 50-70%, depending on drug dosage and other environmental factors. If you have questions regarding your treatment, feel free to reach out and we will do our best to contextualize the data for you. Please note, we pool data from all control populations tested along with your treatment and will often greatly exceed that of treated animals.

Lastly, do not get discouraged by a negative result! As we explore chemical space, understanding which treatments do not effect aging is as important as finding the ones that do! Keep in mind that the number of treatments with no or negative effect on aging will be greater than those that increase lifespan. Often these results are not published in academic research which can result in wasted resources and effort as others try and re-try an experiment. In addition to the publicly available dataset (if you chose to include your data), the data from your sponsorship is added to the Ora Biomedical internal database, which is the largest, highest quality, and most experimentally consistent longevity dataset ever created!

### Methods

Experiments were conducted at 25 degrees Celsius using adult N2 Bristol *Caenorhabditis elegans* from the *Caenorhabditis* Genetics Center. Animals were grown from egg to enrollment in the study at 20C from age-synchronized populations on nematode-growth-media (NGM) agar and fed with laboratory grown *E. coli* bacteria. At late L4 larval stage, 20-25 animals were transferred to NGM agar supplemented with either the compound(s) of interest or relevant solvent controls. Floxuridine was added to prevent progeny production. Observations were made every day using the WormBot automated capture platform and images were analyzed via the WormBot-AI analysis pipeline. For your experiment, we tested compound(s) at the concentration specified below in at least two replicate populations. Data was pooled across these replicate populations and compared to pooled control data. To assess whether the tested treatment extended organismal lifespan, we compared treatment to solvent control using a standard logrank statistical test. See page two for drug information, Kaplan-Meier survival curve, and summary data table. Thank you again for advancing longevity research!

## Drug information from chemical library

Compound Name	Formula	Pathway	Target
Azelnidipine	C33H34N4O6	Membrane Transporter/Ion Channel	Calcium Channel

## Survival curve

## Summary table

Treatment	Median lifespan	# animals	# replicates	95% LCL	95% UCL	Log-rank p-value
Control	13.1	225	12	12.0	13.1	-
10uM Azelnidipine	14.0	71	4	13.1	14.0	0.083

*LCL - lower confidence interval UCL - upper confidence interval*

Questions? Comments? Please contact us at [MMC@orabiomedical.com](mailto:MMC@orabiomedical.com). Want to repeat your experiment? Use our web-page to sponsor an additional experiment.

## Terms and Conditions

*Effective Date: Jan 1, 2024*

*Revised: Feb 12, 2024*

Thank you for sponsoring an intervention for longevity testing through the Million Molecule Challenge, an effort dedicated to fostering the advancement of scientific research through community sponsorship. By using our website and services offered by Ora Biomedical, Inc. ("Ora"), you agree to these Terms and Conditions. Please read them carefully.

### 1. Acceptance of Terms

By accessing or using our services or sponsoring our experiments, you agree to be bound by these Terms and Conditions and our Privacy Policy.

### 2. Research Sponsorship

Our platform allows individuals ("Sponsors") to financially support specific research experiments. Sponsors will receive periodic updates and data regarding the experiments they support.

### 3. Data Sharing and Intellectual Property

- (a) Ora retains the right to use the sponsored research data for its own educational, research and commercial development purposes, and permits Sponsors to use the data for educational, research and commercial purposes, subject to participation right described below and provided the Sponsor mentions Ora in subsequent presentations or publications.
- (b) Data from the experiments will be placed in an unrestricted open access database, available to anyone with an internet connection, unless a Sponsor requests confidentiality or restricted access for specific data.
- (c) Should Sponsor wish to pursue any potential commercial development opportunities arising from the data funded by the Sponsor or otherwise made available in the open access database, Sponsor agrees that Ora retains an option, exercisable by Ora in its sole discretion at no cost, to participate in Sponsor's commercial development. This participation shall include but not be limited to: replication and dose response studies to validate experimental results, studies using disease-specific models to test intervention effect outside of healthy longevity, and additional validation in mammalian or other organisms.
- (d) Ora and relevant employees shall be listed as co-authors in any academic or research publications or presentations that arise from the use of the sponsored research data, in accordance with academic and publishing standards.

### 4. Compliance with Laws

- (a) Ora complies with all applicable laws and regulations in conducting research, including but not limited to those of the United States and international standards.
- (b) Sponsors agree to comply with all applicable laws and regulations in their use of the data and information provided.

## 5. Disclaimer and Limitation of Liability

**This website, the research experiments available for sponsorship, and the database with research results are provided AS IS and without warranty of any kind.** Ora does not warrant that the website will operate correctly or be free of computer viruses, nor does Ora guarantee the success or specific outcomes of any research experiment. Sponsors agree to hold Ora and any other Sponsors or coordinators harmless from any claims related to the sponsored research.

**The information on our website and the results from our sponsored research are not intended to and may not be construed as medical advice.** Results provided are in no way meant to inform or constitute medical advice. If you or someone you know suffers from any disease or ailment that is the subject of any sponsored research, you should consult with a qualified physician. Use of the website, the sponsored research and resulting data is entirely at your own risk.

IN NO EVENT WILL ORA OR ANY OF ITS LICENSORS OR SERVICE PROVIDERS BE LIABLE UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ITS SUBJECT MATTER UNDER ANY LEGAL OR EQUITABLE THEORY, INCLUDING FOR LOSS OF PROFITS, DATA, GOODWILL, OR OTHER INTANGIBLE LOSS, OR FROM ANY INDIRECT, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, RESULTING FROM SPONSOR'S USE OF THE SITE OR SERVICE.

## 6. Indemnification

You agree to indemnify and hold harmless Ora and its officers, directors, employees, and agents from any claims, damages, losses, liabilities, and expenses arising out of your use of the site and services.

## 7. Modification of Terms

Ora reserves the right to modify these terms at any time. Continued use of the site and services after any such changes shall constitute your consent to such changes.

## 8. Governing Law and Venue

These Terms and Conditions are governed by the laws of the State of Washington without regard to its conflict of law principles. Any dispute arising hereunder must be brought in state or federal courts located in King County, State of Washington.

## 9. Contact Us

For any questions or concerns regarding these terms, please contact us at [mmc@orabiomedical.com](mailto:mmc@orabiomedical.com).
